## ➤ W65Z WALKIE PALLET TRUCK

The W65Z is just another great example of Hyster Company's commitment to continually earn your trust with materials handling equipment targeted to your operation's needs. Its technically advanced yet uniquely appealing capabilities will ensure a smooth integration into your existing 12-volt operations.

Equipped with one of three optional environmental packages: cooler/freezer/food processing, the W65Z walkie will easily handle capacity loads in a number of applications. The sealed componentry of the food processing package keeps out the moisture of hot-water wash-down.

The W65Z truck's bottom-mounted handle conveniently provides you control of all functions with either hand, including the horn. Its angle hand-grips and raised body design provide "when-you-need-it" protection for your fingers and knuckles.

A creep speed or "turtle" button is located on the operator side of the handle. It allows operation of the truck, even when the handle is in the upright position. The modular design of the handle makes servicing simple.

The handle's raised lift/lower buttons afford intuitive fingertip operation. The handle's traction reversing switch (belly switch) wraps the end of the handle, enabling actuation throughout its full range of pivot.

The W65Z pallet truck's fork profile has been designed with a tapered nose and shortened pallet exit skid. In addition, we used a wider exit roller and moved it closer to the load wheel. Both design enhancements help ensure easier entry and exit from any pallet, loaded or unloaded. A full 6-inches of lift height makes traveling across uneven floors and over dockboards or ramps hassle-free. The box-section construction of the forks provide unmatched durability and strength.

Adjustable two-piece heavy-duty pull rod assemblies with replaceable threaded ends allows easy height compensation as the load wheels wear. Knock-out axles facilitate quick and easy wheel replacement.

The W65Z walkie pallet truck is equipped with the proven technology of Separately Excited Motor (SEM) with transistor controls and hydraulics, giving you unsurpassed energy efficiency. The solid-state transistor controls, circuit boards, and microprocessor significantly reduce the number of parts, wires and couplings, maximizing your uptime. The transistor controls also increase the life of the traction motor brushes, minimizing servicing events even further. The energy efficiency of both the SEM system and transistor hydraulic control adds up to fewer battery replacements over the life of your W65Z walkie trucks.

# INNOVATIVE TRUCKS ENGINEERED TO MEET THE MOST DEMANDING APPLICATIONS

For more than 80 years, Hyster has been conquering the world's most demanding applications. In the 1920's Hyster started as a manufacturer of lifting machines used in the rigorous logging industry of the United States' Pacific Northwest. A few years later the first forklift trucks were invented and the Hyster brand quickly gained its reputation for rugged quality. Hyster® lift trucks are designed to lower your cost of operations. Every truck we make — gasoline, LPG, diesel and electric — is purpose-built to excel in its application. Every truck is also backed by an unmatched network of specialists.

**Dealer Network** — Our Dealer Network can offer the expertise of fleet managers, parts suppliers, capital procurement specialists and trainers. Carefully chosen dealers fully understand customer applications, assist in selecting the right lift truck and provide fast, reliable support.

**Hyster Fleet Services** — Even if you operate other brands, we can manage your maintenance and replacement plan. We can offer complete fleet analysis, fleet history summary and a cost-effective proposal for replacement and scheduled maintenance.

**Parts** — With genuine Hyster® replacement parts and UNISOURCE™ parts for all makes of lift trucks, we are your one-stop source for lift truck parts. In fact, we offer more than 7 million part number crosses for most brands of materials handling and other in-plant mobile equipment.

**Rental Products** — When leasing or buying isn't a practical option, we have access to more than 14,000 units for short- and long-term rental. We'll help you maintain output in a cost-effective manner.

**Hyster Capital** — We can arrange solutions for special financing requirements, taking the difficulties out of buying the equipment you need. Whether you purchase or lease a new or used lift truck, Hyster Capital offers superior service and competitive rates.

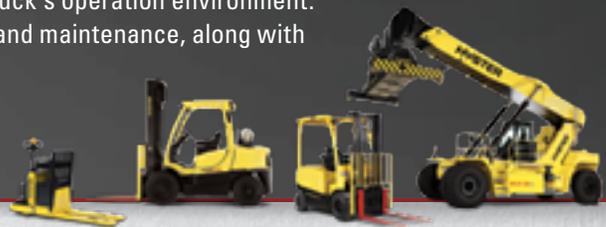

**Special Products Engineering Department (SPED)** — Different materials require different handling. That's why we can work with you to customize your lift trucks. From strobe lights to specially made forks, SPED has the tools to help you get the job done right.

**Operator Training** — Proper education in operating lift trucks minimizes the risk of injuries due to accidents while increasing productivity. Hyster offers OSHA-compliant materials that support the training of qualified operators.

**Service** — Your local Hyster® dealer offers a flexible, customized and comprehensive maintenance plan based on each lift truck's operation environment. Hyster service programs offer scheduled inspections and maintenance, along with quick, responsive service dispatched to your location.
