EQUIPMENT & WEIGHT

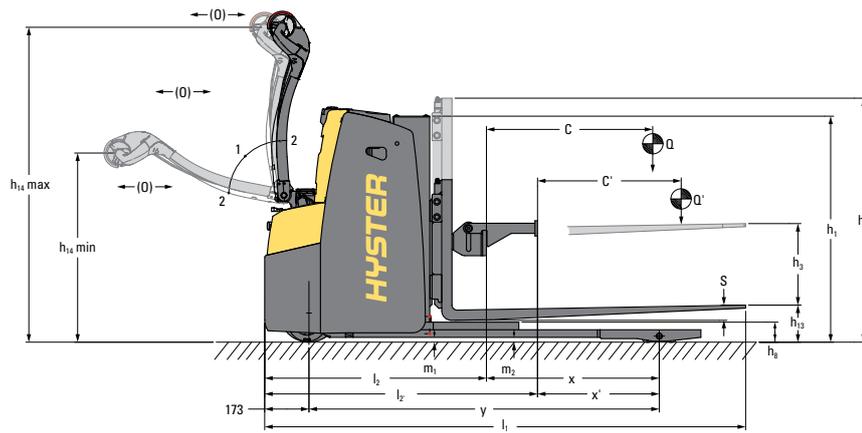

Weights (line 2.1) are based on the following specifications: Complete truck with 125mm forks with integrated load backrest, polyurethane driver and load wheels.

NOTICE

Care must be exercised when handling elevated loads. When the carriage and/or load is elevated, truck stability is reduced. It is important that the mast tilt in either direction is kept to a minimum when loads are elevated. Operators must be trained and must read, understand and follow the instructions contained in the Operating Manual. All values are nominal values and they are subject to tolerances. For further information, please contact the manufacturer. Hyster products are subject to change without notice. Lift trucks illustrated may feature optional equipment. Values may vary with alternative configurations.

Specification data is based on VDI 2198

 **Safety:** This truck conforms to the current EU requirements.

$$A_{st} = W_a + R + a$$

$$R = W_a + \sqrt{(l_6 - x)^2 + \left(\frac{b_{12}}{2}\right)^2}$$

$$a = 200 \text{ min}$$
