

J2.5-3.0XNL

WITH INTEGRATED LITHIUM-ION BATTERY

TOP 5 PRODUCT FEATURES

1 ENERGY EFFICIENT

- Fast charging times increase operational uptime
- Opportunity charging has no adverse effect on battery life
- Truck retains full suite of low state of charge safety features

2 LOWERED SEAT AND FLOOR PLATE

- Allows easy ingress and egress from the truck
- Cowl lower by 86mm to allow better fork tip visibility
- Allows for mounting an air suspension seat with upgraded operator comfort for maximum productivity
- Increased headroom and freedom to move

3 OPEN SPACE DESIGN

- Maximises comfort and convenience
- Gives increased freedom to position feet during operation

4 REPOSITIONED CENTRE OF GRAVITY

- Enhances drive quality
- Improves truck handling in corners

5 EASY OPERATION

- External charge socket allows quick and easy connection
- No battery exchange process needed.

LITHIUM-ION POWERED

- 80V integrated 420Ah Li-ion battery provides long periods of truck operation before the need for recharging
- 100% battery state of charge from fully flat within two hours.
- Li-ion batteries can support intensive three-shift operations without battery exchange (via fast opportunity charging).

REDUCED TRUCK WEIGHT

- The truck weighs just over 300 kg less than the equivalent lead-acid powered model.
- This reduction in truck weight improves acceleration and reduces energy consumption for long run times in demanding applications

VIRTUALLY MAINTENANCE FREE

- Virtually maintenance-free components.
- Li-ion batteries cut down on maintenance requirements and do not require topping up or equalisation charging.
- Li-ion batteries are seen as a more environmentally attractive solution for power
