

UNLOCK FLEXIBILITY WITH ONBOARD CHARGING

1 TRUCK = MANY CHARGING OPTIONS

Onboard

Offboard

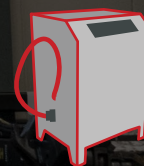

120V 12A

240V 50A

240V 30A

Available on many Hyster® integrated lithium-ion forklift models, onboard charging gives you the flexibility to charge via a cable and adaptors that connect to commonly available electrical outlets, in addition to traditional off-board fast charging. This option can make electric forklifts a stronger fit for:

- Applications that don't require fast charging
- Operations that don't want to change their electrical infrastructure
- Job sites with intermittent charging availability
- Remote operations where a generator is the only power source
