† Rated load figures are based on 3000 lb (1361 kg) load and a 24" load center. **NOTE:** Performance specifications are for truck with standard equipment. Performance specifications are affected by the condition of the vehicle and how it is equipped as well as the nature and condition of the operating area. If these specifications are critical, the proposed application should be discussed with your dealer.

**CERTIFICATION:** These Hyster® lift trucks meet the design and construction requirements of B56.1-1969, per OSHA Section 1910.178(a)(2), and also comply with the B56.1 revision in effect at time of manufacture. Performance specifications are for a truck equipped as described under standard equipment on this technical guide. Performance specifications are affected by the condition of the vehicle and how it is equipped, as well as by the nature, condition of the operating area, proper service and maintenance of the vehicle. If these specifications are critical, the proposed application should be discussed with your dealer.

Battery compartment length is measured from front to rear. Battery compartment width is measured across truck. SB350 Amp "red" connector, cable position B, cable length 16" (405mm). Maximum cable gauge 1/0 AWG. Battery with lid will NOT fit in battery compartment. Battery weight range 1600 - 1900 lb. Amp hour capacity min/max - 24 volt truck 960/1240. 36 volt truck 600/775.

**Note:** Speed limits are for trucks at operating temperature with fully charged battery. Speeds are the same in either direction, with or without rated load.

For lift heights between 24.0" (610 mm) and 212.0" (5385 mm), traction speed is reduced when steering angle exceeds 10°.

<sup>&</sup>lt;sup>1</sup> Speeds are the same in either direction, with or without rated load. Steer angle <10 degrees.

<sup>&</sup>lt;sup>2</sup> Optional with Hyster Power Cellect™

<sup>\*</sup> Travel above 212.0" (5385 mm) fork height requires a high level traction option. Capacity reduction required.
