

RAISE THE STANDARD FOR LAST-MILE DELIVERY

DOUBLE THE IMPACT WITH ONE SMART SOLUTION

Introducing the Route Runner™, a revolutionary two-part system from Hyster®, designed to drive your delivery operation to new levels of productivity. This system includes the DS12ALZ motorized sled nested within the DW33ALZ pallet truck.

This transformative design allows for efficient unloading of pallets from trailers, and the sled can be easily separated to replenish stock inside stores or other tight spaces.

This system eliminates the need for down-stacking products and using handcarts, streamlining the entire process and providing exceptional ergonomic comfort.

TACKLE CHALLENGING TERRAIN

The Route Runner™ can improve efficiency by decreasing the time needed for each delivery, potentially allowing for more stops per shift. This enhancement may help to reduce fleet size, lower labor costs, and decrease manual handling by up to 50%.

~63 minutes saved per route,
improving time efficiency

~27,000 pounds less lifted per route,
reducing physical strain

~1,980 fewer steps taken per route,
reducing fatigue

This efficiency can help you meet peak demand and timely deliveries, which may enhance reliability and customer satisfaction.
