HYSTER® LIFT TRUCKS BRING ANY JOB DOWN TO SIZE.

Hyster is the name branded into some of the toughest trucks on earth. And nowhere is its strength more impressive than in the raw muscle of its big trucks. These workhorses thrive in the most demanding conditions and tackle the most monumental loads.

For over 80 years we’ve worked with our customers to develop the equipment that’s right for their specific needs. Along the way we’ve been instrumental in helping them grow and evolve. And today we continue to help clients overcome challenges with innovative solutions that keep them ahead of the competition.

From lumber yards to ship yards, in concrete plants and steel mills, Hyster continues to be a leader in the lift truck industry, making today’s tough challenges yesterday’s problems.
INNOVATIVE DESIGN MAKES HYSTER® TRUCKS AS SMART AS THEY ARE TOUGH.

Engineering advances have made our trucks some of the most durable and reliable trucks on the market. From nine-ton capacity fork trucks to our reach stacker, our big trucks are titans in the industry.

Through smart design, routine maintenance is made quick and easy. All engine, transmission and other service check points are conveniently located and easy to reach. Even on our largest trucks, daily service checks can be completed in only a few minutes, helping to keep your trucks moving and lowering the cost of operation.

Designed to help make your operators more productive while keeping them safe, all of our big trucks feature the ergonomically advanced ComforCab II. Oftentimes work conditions and long hours can be tough on operators, but through smart design, our lift trucks ensure your work force is always moving at maximum efficiency.

*Leading the way with superior productivity, durability and comfort infused into each truck, Hyster lift trucks are the obvious choice.*
Before a Hyster® lift truck’s inception, extensive customer research feeds into the design objectives, making sure we are in touch with what owners and operators really want.

Next, our trucks are run through our world-class testing facilities where they must pass stringent requirements. Components and prototypes undergo test cycles equivalent to years of continuous truck operation in extreme conditions. Before any of our trucks get to you, they’ve had to prove themselves worthy of the Hyster name.

Our customers have come to depend on Hyster lift trucks day after day and year after year. You face many challenges, dealing with downtime shouldn’t be one of them. That’s why Hyster lift trucks are built to be some of the most dependable and reliable trucks on the market.

The powertrain is the heart and soul of any lift truck. And to ensure our trucks perform at the highest level, we’ve partnered with some of the leading manufacturers of critical components. Cummins engines and transmissions from top tier manufacturers go into every Hyster big truck. And with purpose-built frames and masts, it’s no surprise we produce some of the toughest trucks in the world.
With such a wide range of product lines, we have a truck designed specifically for the toughest industries and applications. But sometimes you need a truck engineered to meet the specific needs of your operation. For that reason Hyster created their Special Products Engineering Department (SPED). Here, your specific needs are not just an afterthought. We understand this customization may be critical to the success of your operation. Our special design team of SPED engineers will work directly with you to ensure your trucks are optimized for your application requirements.
The might of our massive machines isn’t truly realized without the support you get from the Hyster Dealer Network. With us you get the industry’s most responsive and comprehensive after-the-sale support team. Our North American dealer network consists of 225 authorized locations with an average of more than 32 years of experience in the materials handling business.

With offices spanning the globe, our dealers have access to a plethora of resources and knowledge to deliver world-class service at a personal and local level. You get the expertise and experience from designers and engineers from around the world right in your own backyard.

We know how important uptime is to your operation. With a broad product line and comprehensive dealer coverage, you can expect the most responsive service and best parts availability (often just a day away) found anywhere.

As industries have grown and our customers have evolved, our dealers have adapted right along with them. They not only learn the customers’ immediate needs, but also focus on future goals to help develop the right equipment that allows them to fulfill both.

Any company worth its weight knows success has just as much to do with the support before and after the sale itself. We pride ourselves as having one of the industry’s largest and most experienced dealer network. The Hyster Dealer family extends around the world providing support to global operations – when and where it’s needed. Go to Hyster.com to find the dealer nearest you.
**BIG TRUCK OFFERING**

- **H190-360HD<sub>2</sub>**
  A versatile truck designed for indoor and outdoor use, this truck is ideally suited for a wide variety of applications such as general cargo, steel manufacturing and foundry applications.

- **H360HD<sub>2</sub>-EC4**
  Designed for outdoor use this truck is ideally suited for applications such as sea ports and applications where unloading, loading and single row empty container stacking is applicable.

- **H360-36/48HD**
  Provides outstanding performance in many industries and applications, including pipe handling, general and crated cargo, breakbulk, lumber, steel and concrete.

- **H550-700HD/S**
  The Hyster® H550-700HD/S series of diesel powered lift trucks offers best-in-class operator comfort, fast handling, reliable, proven components, high productivity and represents an excellent return on investment.

- **H800-1050HD/S**
  These diesel engine powered lift trucks will conquer applications that require moving heavy duty loads ranging from 80,000-105,000 pounds.

- **H400-450HD/S**
  A versatile truck designed for outdoor use, this truck is ideally suited for applications such as lumber mills, steel mills, mining operations, general cargo and moving empty shipping containers.

- **H1050-1150HD-CH**
  The outstanding lift capacity of the H1050-1150HD-CH Container Handlers is a combination of the latest engine, transmission and hydraulic technologies, offering superior performance in all facets of container handling.

- **HR45 REACHSTACKER**
  With the shortest turning radius in the container handling business, the ReachStacker will turn circles around the competition.

- **H400-500HD-EC**
  Since 1997, Hyster lift trucks have been leaders in the empty container handling industry. These empty container handlers strike an excellent balance in operator comfort, outstanding performance and serviceability.

- **H360-36/48HD**
  Provides outstanding performance in many industries and applications, including pipe handling, general and crated cargo, breakbulk, lumber, steel and concrete.
We know that properly trained operators are key to a profitable company. So to ensure you get the most out of your Hyster fleet, we come to you. We’ll do an initial setup at your location and train the service technicians who will be maintaining your trucks.

Whether you have one truck or a fleet of trucks in multiple locations around the nation or around the world, Hyster can provide the tools to help you manage your equipment to achieve the lowest operating cost and the highest productivity.

Contact a Hyster® Dealer about the big truck that’s right for you.

Hyster offers a full line of lift trucks to meet a variety of applications for your operation.

**ELECTRIC COUNTERBALANCED**
This series of lift trucks is designed to be versatile and productive — ideal for warehouse, retail or industrial applications.

**MOTORIZED HAND**
Exceptional maneuverability and industry exclusive options give your operators the power to get more done.

**NARROW AISLE**
Careful attention to ergonomics and serviceability make Hyster® narrow aisle lift trucks some of the most productive and dependable in their class.

**I.C.E. CUSHION**
Using a truck from the Fortis series means low cost of operations, dependability and owning a lift truck that's still going strong long after the day's work is done.

**I.C.E. PNEUMATIC**
Our Internal Combustion Pneumatic Tire Series of trucks were designed to be rugged and durable — thriving in your challenging applications.
