**WHY IS PERIODIC MAINTENANCE IMPORTANT?**

- **Extend Your Truck Life**
  - Longer operation time
  - Higher resale value

- **Improve Your Productivity**
  - Higher equipment efficiency
  - Increased uptime
  - Lower operational costs

- **Protect Your Investment**
  - Helps ensure a small problem does not turn into costly repairs

**MAINTENANCE OPTIONS**

**FOR QUALITY PERFORMANCE AND PEACE OF MIND**

**LEVELS OF SERVICE**

Behind every productive operation is a well-maintained machine. It's easy to sustain exceptional productivity when you entrust your routine maintenance needs to a CERTECH Certified Technician. Our skilled technicians are provided state-of-the-art training to ensure your truck, or fleet of trucks, continues to operate at optimal performance levels.

With multiple periodic maintenance options available, we can offer a maintenance plan to accommodate almost any budget or working environment. Let us recommend the best option for your application.
In addition to the Basic PM Services, this scheduled maintenance plan covers the scheduled maintenance intervals that typically occur at 1,000, 2,000, and 4,000 hours**. These services typically include items such as: engine tune-up; transmission, hydraulic fluid and filter replacement; coolant replacement; lubrication of axle bearings; and inspection of additional systems including brakes, steering, and fuel systems*. The Balanced Budget PM plan ensures your truck conforms to factory recommended Periodic Maintenance services and is in compliance with the manufacturer’s required maintenance schedule. Warrantable repairs occur. The Balanced Budget PM provides you with a fixed monthly billing program for all unique intervals associated with Periodic Maintenance services throughout the year.

With our Power Assurance plan, we combine our Balanced Budget PM program with Hyster’s enhanced extended coverage plan for the engine and engine cooling system. If you are looking for coverage that can eliminate maintenance cost spikes due to repairs resulting from engine or cooling system failures while keeping your truck maintained in accordance with factory recommendations, then the Power Assurance Plan* is for you. The Power Assurance PM plan covers internal combustion trucks powered by gasoline or LPG fuel only, with capacities up to 15,500 lbs. and terms up to 10,000 hours or 5 years, whichever comes first.

This plan covers components and systems above the Power Assurance Plan providing a more comprehensive, enhanced plan. Combined with our Balanced Budget PM, this extended coverage plan also includes such items as transmission, drive unit, electronics, seals, and bearings. This plan is offered on all electric powered and internal combustion trucks with capacities up to 36,000 lbs. for a term up to 10,000 hours or 5 years, whichever comes first.

Our Full Maintenance plan offers the most comprehensive coverage, including all levels of PM services, as well as parts replacement coverage on nearly every part on your lift truck. Offered at a fixed monthly rate, our Full Maintenance plan, can eliminate those unforeseen maintenance costs that may arise over the life of the truck. This plan may exclude certain wear items such as seats, tires, and forks and typically will not cover neglect and avoidable damage.

* Ask us about coverage details on all offered plans.
** Intervals will vary by type and brand of truck
